Volume 15

Adams, M. D. and Probert, P. J. The interpretation of phase and intensity data from AMCW light detection sensors for reliable ranging 15:5 pp. 441–458.

Aicardi, M., Casalino, G. and Cannata, G. Contact force canonical decomposition and the role of internal forces in robust grasp planning problems 15:4 pp. 351–364.

Brost, R. C., and Christiansen, A. D. Probabilistic analysis of manipulation tasks: A conceptual framework 15:1 pp. 1–23.

Cılız, M. K. and Narendra, K. S. Adaptive control of robotic manipulators using multiple models and switching 15:6 pp. 592–610.

Delcomyn, F., Nelson, M. E. and Cocatre-Zilgien, J. H. Sense organs of insect legs and the selection of sensors for agile walking robots 15:2 pp. 113–127.

Doel, K. van den and Pai, D. K. Performance measures for robot manipulators: A unified approach 15:1 pp. 91–111.

Durrant-Whyte, H. An autonomous guided vehicle for cargo handling applications 15:5 pp. 407–440.

Egeland, O., Dalsmo, M. and Sørdalen, O. J. Feedback control of a nonholonomic underwater vehicle with a constant desired configuration 15:1 pp. 24–35.

Formal'sky, A. M. and Lavrovsky, E. K. Stabilization of flexible one-link arm position: Stability domains in the space of feedback gains 15:5 pp. 492–504.

Hannaford, B., Marbot, P.-H., Buttolo, P., Moreyra, M. and Venema, S. Scaling of direct drive robot arms 15:5 pp. 459–472.

Hollerbach, J. and Wampler, C. W. The calibration index and taxonomy for robot kinematic calibration methods 15:6 pp. 573–591.

Howe, R. D. and Cutkosky, M. R. Practical force-motion models for sliding manipulation 15:6 pp. 557–572.

Jen, F., Shoham, M. and Longman, R. W. Liapunov Stability of force-controlled grasps with a multi-fingered hand 15:2 pp. 137–154.

Jia, Y.-B. and Erdmann, M. Geometric sensing of known planar shapes 15:4 pp. 365–392.

Joskowicz, L. and Taylor, R. H. Interference-free insertion of a solid body into a cavity: An algorithm and a medical application 15:3 pp. 211–229.

Kirćanski, M. Kinematic istotrophy and optimal kinematic design of planar manipulators and a 3-DOF spatial manipulator 15:1 pp. 61–77.

Krotkov, E. and Simmons, R. Perception, planning, and control for autonomous walking with the ambler planetary rover 15:2 pp. 155–180.

Li, Y. F. A sensor-based robot transition control strategy 15:2 pp. 128–136.

Liu, G. and Goldenberg, A. A. Comparative study of robust saturation-based control of robot manipulators: Analysis and experiments 15:5 pp. 473–491.

Liu, J. Spatial reasoning about robot compliant movements and optimal paths in qualitatively modeled environments 15:2 pp. 181–210.

Lynch, K. M. and Mason, M. T. Stable pushing: Mechanics, controllability, and planning 15:6 pp. 533–556.

McLean, A. and Cameron, S. The virtual springs method: Path planning and collision avoidance for redundant manipulators 15:4 pp. 300–319.

Mitiguy, P. C. and Kane, T. R. Motion variables leading to efficient equations of motion 15:5 pp. 522–532.

Moutarlier, P., Mirtich, B. and Canny, J. Shortest paths for a car-like robot to manifolds in configuration space 15:1 pp. 36–60.

Paredis, C. J. J. and Khosla, P. D. Designing fault-tolerant manipulators: How many degrees of freedom? 15:6 pp. 611–628.

Rovetta, A., Sala, R., Cosmi, F., Wen, X., Milanesi, S., Sabbadini, D., Togno, A., Angelini, L. and Bejczy, A. A new telerobotic application: Remote laparoscopic surgery using satellites and optical fiber networks for data exchange 15:3 pp. 267–279.

Shimoga, K. B. Robot grasp synthesis algorithms: A survey 15:3 pp. 230–266.

Shimoga, K. B., and Goldenberg, A. A. Soft robotic fingertips—Part I: A comparison of construction materials; Part II: Modeling and impedance regulation 15:4 pp. 320–350.

Stokes, A. and Brockett, R. Dynamics of kinematic chains 15:4 pp. 393–405.

Sturges, R. H., Sathirakul, K., and Laowattana, S. Directly visualizing spatial freedom from geometric models 15:5 pp. 505–521.

Sundareswaran, V., Bouthemy, P. and Chaumette, F. Exploiting image motion for active vision in a visual servoing framework 15:6 pp. 629–645.

Warshaw, G. D. and Schwartz, H. M. Sampled-data robot adaptive control with stabilizing compensation 15:1 pp. 78–90.

Yang, S.-P., Woo, P.-Y. and Wang, R. Discrete-time model reference adaptive controller designs for robotic manipulators 15:3 pp. 280–289.

Yoshikawa, T. and Hosoda, K. Modeling of flexible manipulators using virtual rigid links and passive joints 15:3 pp. 290–299.

Zhuang, Y. and Goldberg, K. On the existence of solutions in modular fixturing 15:6 pp. 646–656.
